

## Notes on Mastery

Mastery is your time to shine.

How does it work?

1. You'll print off (yes, you must print it off) a mastery sheet from this link:  
[http://www.cs.kzoo.edu/mastery/masteryc2\\_fall2003.php](http://www.cs.kzoo.edu/mastery/masteryc2_fall2003.php)
2. WITHOUT using your notes, or your friends, or the MPC, or your book, or...anything except paper and a writing implement, you'll do the problems. NOTE: This means that using the back of the book for the integrals on this mastery is NOT ALLOWED.
3. You'll bring the sheet and your work to me.
4. We'll go through the problems together.
5. If the problems are all correct, yay! You are a master and are done, having earned an A. If the problems are not all correct, you'll go back to 1), print off a new sheet, and repeat the process until yay, you earn your A for mastery.

A special note: remember that you are demonstrating mastery – be sure to use +C whenever needed, and be sure to use limits if the integral is improper.

**The deadline to complete this is 3 pm on Friday, Week 10.**
