

Topology

We've been talking about shape, and now it's time for you to shape a paper.

This assignment is to write a 2-4 page paper (ie, at least onto a third page by a line) creative story that makes use of at least two of the topological ideas we have been discussing. These ideas include: continuity, continuous deformation, turning a sphere inside out, number and dimension of holes. While this is a creative endeavor, you are expected to write in complete sentences and to use correct grammar. That is, you should be creative with the plot of your paper, but not with the mechanics of the writing.

This paper is due **Friday of Week 9**.

Guidelines for Papers

Papers should be double-spaced, and have no more than a 1-inch margin on any side (including top/bottom). They should have one line of heading, with the title of the essay aligned on the left, and your name aligned on the right. Type font should be no larger than 12 calibri, and should not be times new roman (or times newer roman). For citations and bibliographies throughout the term, MLA style should be used.
